EXPERIENCE

Helpee Elder Care Bangalore, Karnataka
Junior Fullstack Development Engineer December 2025 – present

- Owned the reporting platform end to end, scaling it to 40+ reports used by management and operations teams, with virtualized report views, advanced filtering, Excel downloads and cron-scheduled email delivery.
- Built an invoice-gated attendance workflow for ~300 active bookings: attendance can only be marked for dates covered by an invoice, and corrections to past attendance go through a change-request flow approved by super-admins.
- Built the caregiver replacement workflow, taking a customer's replacement request through care-manager confirmation and automatically setting the outgoing caregiver's closing date and the incoming caregiver's start date.
- Built finance workflows using GraphQL and MongoDB, including payment revisions with role-based auto-approval, billing projections, invoice aging and settlement workflows.
- Built a call-tracking system integrating TeleCMI with Apollo GraphQL subscriptions for real-time incoming-call popups and call logs, alongside Wix traffic, channel and form-level marketing analytics.

Fullstack Development Intern June 2025 – December 2025

- Built a configurable reporting platform using React, Node.js/TypeScript and MongoDB with 30+ reports across leads, deployment, attendance, finance and customer success, including dynamic filters, Excel exports and admin-managed report configuration.
- Implemented role-based access control across 7+ roles with a reusable backend access-filter layer, governing report access and finance actions for teams across 7 cities including Bengaluru, Hyderabad, Chennai, Mumbai, Delhi, Ahmedabad and Pune.
- Built a caregiver rating workflow with rating APIs, automated WhatsApp links through WATI at key booking events, ratings reporting and daily email notifications.
- Developed Customer Success workflows with editable comments, status actions, refund/revive decisions and automated City Head notifications.

Healthletic Lifestyle Bangalore, Karnataka
Backend Development Intern February 2025 – April 2025

- Implemented authentication for backend APIs, including protected routes and access control.
- Developed medicine reminder and tracker APIs covering reminder creation, retrieval, updates, and scheduling-related data handling.
- Created engineering SOPs documenting development workflows, API conventions, and operational processes to improve team consistency.

PROJECTS - https://github.com/Venkataramana-hegde

The Cradle — Fullstack Web Platform | Next.js, TypeScript, Supabase, Hostinger thecradle.co.in

- Built and deployed a production website for The Cradle, implementing responsive pages and dynamic content using Next.js and TypeScript.
- Developed an admin dashboard to manage live-site review submissions, including review approval/deletion and image upload/deletion workflows.
- Integrated the public website with the admin platform to enable content management without directly modifying production data.
- Deployed and maintained the application on Hostinger, handling the production deployment and live-site configuration.

AI Article Summarizer | React, JavaScript, RapidAPI, Netlify https://rad-cat-ccc452.netlify.app/

- Built a React-based article summarization application integrating RapidAPI to process article URLs and generate concise summaries.
- Implemented API integration, loading/error states, and a responsive interface for submitting articles and presenting generated summaries.
- Achieved 94% Performance, 100% Accessibility, 100% Best Practices, and 91% SEO in Lighthouse audits; deployed on Netlify.

SKILLS

- **Frameworks and Libraries:** React, Next.js, Node.js, Express.js, Tailwind CSS, Apollo GraphQL
- **Web Technologies and Databases:** HTML, CSS, MongoDB, Supabase, REST APIs, GraphQL
- **Programming Languages:** TypeScript, JavaScript
- **Developer Tools:** Git, GitHub, VS Code, Vercel, Netlify, Hostinger
- **AI Tools:** Claude, Codex, Gemini

EDUCATION

MVJ College of Engineering Bangalore, Karnataka
Bachelor of Engineering December 2021 – May 2025
CGPA: 8.6

AMC PU College Bangalore, Karnataka
Percentage: 99% July 2019 – July 2021

St. Anthony's High School Hyderabad, Telangana
10th Grade; CGPA: 9.8 May 2009 – July 2019

CERTIFICATIONS

- An Introduction to Generative AI – Infosys Springboard, 2025
- Learn React – Scrimba, 2025
- Project Management Job Simulation – Accenture, 2024
